PROFESSIONAL SUMMARY

Java Full Stack Developer with 2.5+ years of experience designing and delivering scalable, production-ready enterprise applications. Proficient in Java, Spring Boot, Angular, Microservices Architecture, and RESTful APIs. Proven ability to lead high-impact technical migrations with zero downtime, resolve critical production incidents, and collaborate effectively in Agile environments. Recognised with two company awards for exceptional delivery. Oracle Certified Java Associate Programmer (OCJA).

TECHNICAL SKILLS

Languages: Java, Python, C
Backend: Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, Microservices Architecture, OAuth2, JWT
Frontend: Angular, HTML5, CSS3, Bootstrap, Angular Material, JavaScript, TypeScript
Databases: MySQL, MSSQL, MongoDB
DevOps & Tools: Git, Maven, CI/CD, AWS EC2, Apache Tomcat, Swagger, Postman, JUnit, Mockito
IDEs & AI Tools: IntelliJ IDEA, Eclipse, STS, GitHub Copilot, ChatGPT
Methodologies: Agile / Scrum, Code Review, Event-Driven Architecture

PROFESSIONAL EXPERIENCE

Associate Software Engineer — Virtusa *Hyderabad, India | Jan 2024 – Present*

Role: Java Full Stack Developer

- Engineered and maintained RESTful APIs using Spring Boot, Hibernate, and JPA for high-traffic production applications serving thousands of users daily.
- Architected and integrated 8–10 microservices with real-time data synchronisation, improving system modularity and enabling independent deployment of application modules.
- Led migration from Commercial JDK 1.8 to OpenJDK 21 across multiple Spring Boot applications, delivering faster build times, improved API response performance, and elimination of licensing costs.
- Conducted peer code reviews, enforced coding standards, and mentored junior developers, contributing to improved code quality and reduced review cycles.
- Integrated Angular frontend with Spring Boot microservices via REST APIs, implementing HTTP interceptors for JWT-based auth, error handling, and request/response transformation.
- Built and maintained feature-rich Angular modules with reusable components, lazy loading, and reactive forms, improving page performance and reducing load time for end users.

Java Full Stack Developer Intern — Virtusa *Hyderabad, India | May 2023 – Aug 2023*

Role: Full Stack Developer Intern

- Developed RESTful APIs for exam creation, scheduling, automated evaluation, and result generation using Spring Boot and MySQL.
- Built responsive, accessible frontend components in Angular, improving platform usability and reducing page load friction for end users.
- Implemented input validation, role-based access control, and data integrity checks to ensure application security and reliable system performance.

KEY PROJECTS

ViCiOne – CITI Portal 2.0 *Dec 2024 – Present*

Technologies: Java, Angular, Spring Boot, Microservices, MySQL, REST APIs, Git, Maven, Tomcat Server

- Led end-to-end full stack development of an enterprise portal, owning Angular frontend modules and Spring Boot microservice backends.
- Designed microservices architecture enabling real-time data sync across 5 application modules, significantly reducing inter-service latency.
- Executed JDK 1.8 to OpenJDK 21 migration, delivering faster API response time and zero licensing overhead.

- Delivered SSO cutover from Microsoft Authentication to Okta under severe constraints and a tight deadline, with zero downtime across a live production system.

Aurora – Enterprise Web Application *Apr 2024 – Nov 2024*

Technologies: Java, Angular, Spring Boot, Microservices, MySQL, REST APIs, Hibernate, JPA, Swagger

- Developed RESTful APIs using Spring Boot with Hibernate and JPA, enabling seamless data operations across multiple application modules.
- Redesigned SPA architecture by deeply integrating Angular and Spring Boot, improving maintainability and reducing frontend-backend coupling.
- Executed JDK migration to OpenJDK 21, improving application stability and API response time for live production users.
- Delivered enhanced reporting dashboards for multiple user roles, improving operational decision-making and data visibility.

EDUCATION

Master of Computer Application (MCA) *2021 – 2023*

Siliguri Institute of Technology, Siliguri, West Bengal | **CGPA: 9.5 / 10**

Bachelor of Computer Application (BCA) *2018 – 2021*

Kotibarsha Institute of Technology & Management, West Bengal | **CGPA: 8.6 / 10**

CERTIFICATIONS

- Oracle Java Associate Programmer (OCJA) — Oracle Corporation
- GenAI Assisted Engineer — Virtusa
- Cloud Computing with AWS — DevTown

ACHIEVEMENTS & RECOGNITION

- **Virtusa Gem Award (2025):** Awarded for leading the SSO migration of a live Spring Boot application under severe network constraints and a tight deadline, with zero downtime.
- **Virtusa Spot Award (2024):** Recognised for outstanding performance, on-time delivery, and milestone achievements across the Aurora enterprise project.
- **YouTube Creator — 19K+ Subscribers:** Built and grew a vlogging & technical YouTube channel from scratch to 19K+ subscribers, demonstrating strong communication skills, consistency, and audience engagement.
